Mateusz Lugowski, Solution Architecture Intern, **Vladyslav Melnyk**, Solution Architect

1. Team Introduction
2. Deep Learning based Natural Language Search
3. Planogram - Shelf Compliance at Point of Sale
4. Helpdesk Ticket Classification
5. Discussion & Closing

Philip Morris International is a leading international tobacco company, with a diverse workforce of around 81,000 people. Our products are the choice of 150 million consumers worldwide, and for those who choose to continue to smoke, we will continue to offer them the best quality products. But that's not where our vision for smokers ends.

We're dedicated to doing something very dramatic – replacing cigarettes with the smoke-free products that we're developing and selling. That's why we have a total of over 400 dedicated scientists, engineers, and technicians developing less harmful alternatives to cigarettes at our two Research & Development sites in Switzerland and Singapore. It's the biggest shift in our history.

This company transformation triggers demand for innovative IT solutions such as Artificial Intelligence & Machine Learning that will help us automate our business processes, releasing time & energy of our employees to focus on generating value to our customers and implementing our strategy towards smoke-free future.

ZAPRASZAMY!
