Luiz do Valle Miranda

Luiz do Valle Miranda is a Ph.D. candidate at the Jagiellonian University in Technical Computer Science since 2023. He graduated in BA in Cognitive Science at the John Paul II Catholic University of Lublin (2018) and received the title of MA in Philosophy from the University of Antwerp (2020). His academic work focuses on the research and development of knowledge-based systems, with special focus on graph-based data representation. His interest lies in the intersection between machine learning methods and explicitly represented background knowledge towards the creation of intelligent technology that fosters care and human flourishing.
