

GEIST research areas and expertise:

- artificial intelligence,
- knowledge-based intelligent systems
- knowledge engineering, knowledge representation, inference,
- rule-based systems, tabular rule-based systems,
- evaluation, verification and validation of intelligent systems,
- logic programming and prolog,
- the semantic web and internet technologies
- semantic knowledge wikis,
- relational databases, and data warehouses
- geographical information systems (gis)
- software engineering methods
- intelligent control for mobile robots
- plan generation, planning systems, problem solving,
- automated diagnosis.
