GEIST research areas and expertise:

- artificial intelligence,
 - ∘ ai
- knowledge-based intelligent systems
 - intelligent systems
- knowledge engineering, knowledge representation, inference,
 - ∘ KE KR
- rule-based systems, tabular rule-base systems,
- evaluation, verification and validation of intelligent systems,
- logic programming and prolog,

rules

- · the semantic web and internet technologies
- · semantic knowledge wikis,
- relational databases, and data warehouses
- geographical information systems (gis)
- software engineering methods
- intelligent control for mobile robots
- plan generation, planning systems, problem solving,
- automated diagnosis.
