GEIST research areas and expertise

1)

AI and Expert Systems

- · artificial intelligence,
- knowledge-based intelligent systems
- knowledge engineering, knowledge representation, inference,
- rule-based systems, tabular rule-base systems,
- evaluation, verification and validation of intelligent systems,
- logic programming and prolog.

Semantic Web Technologies

- the semantic web and internet technologies
- semantic knowledge wikis,

Databases

- relational databases, and data warehouses
- geographical information systems (gis)

Software Engineering

software engineering methods

Control and Automation

- · intelligent control for mobile robots
- plan generation, planning systems, problem solving,
- · automated diagnosis.

Formal Methods
