

# GEIST research areas and expertise

1)

## AI and Expert Systems

- artificial intelligence,
- knowledge-based intelligent systems
- knowledge engineering, knowledge representation, inference,
- rule-based systems, tabular rule-base systems,
- evaluation, verification and validation of intelligent systems,
- logic programming and prolog.

## Semantic Web Technologies

- the semantic web and internet technologies
- semantic knowledge wikis,

## Databases

- relational databases, and data warehouses
- geographical information systems (gis)

## Software Engineering

- software engineering methods

## Control and Automation

- intelligent control for mobile robots
- plan generation, planning systems, problem solving,
- automated diagnosis.

## Formal Methods

1)
